

STAY SECURE AS A REMOTE WORKER

SECURITY CHECKLIST WORK FROM HOME

REMOTE WORK SECURITY CHECKLIST

There are many benefits to working remotely, including less time spent commuting, less office distractions, and lower possibility of catching a serious infection. That said, when you work remotely, whether from home or a location across the globe, YOU are the sole responsible party for ensuring the security of your person, your devices, and any information you carry. Please go the following checklist to ensure you are ready for working remotely.

Nr	Question	Status
1.	Is your local Firewall enabled?	<input type="checkbox"/>
2.	Is your Antivirus active and updated?	<input type="checkbox"/>
3.	Are all security related tools activated (e.g. Windows Defender)?	<input type="checkbox"/>
4.	Did you update your operating system?	<input type="checkbox"/>
5.	Did you update all apps you work with (e.g. Chrome Browser, Adobe reader etc.)?	<input type="checkbox"/>
6.	Do you know all your company policies (BYOD, Remote Work, Internet usage etc.)?	<input type="checkbox"/>
7.	Have you created a separate user account for work related tasks?	<input type="checkbox"/>
8.	Did you ensure that your work account has no administrative privileges?	<input type="checkbox"/>
9.	Do you have encryption software in use to protect folders with sensitive company data?	<input type="checkbox"/>
10.	Did you make sure that your PC locks automatically after 5 minutes?	<input type="checkbox"/>
11.	Did you change your password and ensured that you selected a new, strong password?	<input type="checkbox"/>
12.	Do you store your passwords at a secure location (e.g. password manager)?	<input type="checkbox"/>
13.	Did you secure your mobile device (enable remote wipe, find my device, deleted unused apps etc.)?	<input type="checkbox"/>
14.	Did you ensure that your WI-FI router uses strong encryption and access is only granted to people you trust?	<input type="checkbox"/>
